

SREEJA AKUTHOTA

Business Intelligence Developer

Texas, USA | +1 972-583-8873 | sreejaakuthota96@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Business Intelligence Developer with **5+ years** of experience designing enterprise analytics, **ETL/ELT** pipelines, and scalable BI solutions across healthcare and financial services. Skilled in **Python, SQL, PySpark, AWS, Tableau**, and **Power BI** to build data models, automate reporting, and deliver actionable insights that improve operational performance and business decision-making. Recognized for translating complex data into meaningful analytics, collaborating with cross-functional stakeholders, and delivering reliable, scalable reporting solutions in fast-paced enterprise environments.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Business Intelligence & Data Visualization: Power BI, Tableau, DAX, Dashboard Development, KPI Reporting, Executive Reporting, Data Visualization

Data Engineering: ETL/ELT, PySpark, Apache Spark, Apache Airflow, dbt, Kafka, Data Modeling, Dimensional Modeling, Data Integration, Data Validation, Data Quality, Data Governance

Databases & Data Warehousing: Amazon Redshift, Snowflake, PostgreSQL, MongoDB

Cloud & DevOps: AWS (S3, Glue, Lambda, Redshift, CloudWatch, IAM), Docker, Jenkins, GitHub Actions, CI/CD

AI & Advanced Analytics: MLflow, TensorFlow, NLP, Retrieval-Augmented Generation (RAG), Predictive Analytics

API Development: REST APIs

Development Methodologies: Agile (Scrum)

Soft Skills: Cross-Functional Collaboration, Stakeholder Management, Analytical Problem Solving, Business Communication, Process Improvement

PROFESSIONAL EXPERIENCE

VCU Health Systems, USA | Business Intelligence Developer

Mar 2025 - Present

- **Engineered** scalable **ETL/ELT** pipelines using **Python, SQL, PySpark, Apache Airflow**, and **AWS**, processing **10M+** clinical and operational records daily while reducing data latency by **30%** and improving enterprise reporting reliability.
- **Architected** enterprise data models and automated reporting workflows by integrating **Epic Clarity, SQL**, and **Amazon Redshift**, enabling standardized healthcare analytics and improving reporting accuracy by **28%** across clinical and administrative teams.
- **Developed** interactive executive dashboards in **Tableau** and **Power BI** to monitor patient outcomes, operational KPIs, resource utilization, and financial performance, increasing stakeholder adoption by **35%** and accelerating data-driven decision-making.
- **Implemented** automated data quality, reconciliation, and validation frameworks using **Python, SQL**, and **AWS Glue**, reducing reporting discrepancies by **25%** while strengthening compliance with healthcare data governance standards.
- **Optimized** complex **SQL** queries, **PySpark** transformations, and cloud workloads across **AWS Redshift** and **S3**, improving report execution performance by **40%** and supporting near real-time analytics for cross-functional business users.
- **Integrated** predictive analytics models into BI reporting workflows using **Python, TensorFlow**, and **MLflow**, enhancing demand forecasting, patient volume planning, and operational resource allocation with measurable improvements in planning accuracy.
- **Collaborated** with clinical leaders, finance teams, and enterprise stakeholders to translate reporting requirements into scalable analytics solutions using **Agile** methodologies, delivering trusted KPI reporting that supported strategic planning and continuous process improvement.

PNC Financial Services, USA | Business Intelligence Engineer

Jul 2024 - Feb 2025

- **Designed** enterprise **ETL/ELT** pipelines using **Python, SQL, Apache Airflow, PySpark**, and **AWS**, integrating customer, transaction, and risk data to improve reporting availability by **30%** for business intelligence initiatives.
- **Built** dimensional data models and optimized **SQL** transformations within **Amazon Redshift**, enabling faster executive reporting, regulatory analytics, and self-service dashboards while reducing report generation time by **35%**.
- **Automated** data ingestion and transformation workflows using **AWS Glue, Lambda**, and **S3**, eliminating repetitive manual processes and improving pipeline reliability and operational efficiency across reporting environments.
- **Delivered** interactive **Tableau** and **Power BI** dashboards that tracked portfolio performance, customer behavior, operational KPIs, and risk metrics, providing executives with timely insights for strategic decision-making.
- **Established** enterprise data quality and reconciliation frameworks using **SQL** and **Python**, reducing reporting inconsistencies by **25%** while improving governance, audit readiness, and confidence in business-critical analytics.
- **Enhanced** large-scale **Spark** and **SQL** workloads through query optimization, partitioning strategies, and resource tuning, decreasing processing runtimes by **20%** and improving scalability for enterprise reporting.
- **Partnered** with finance, compliance, risk, and business stakeholders in an **Agile** environment to translate reporting requirements into scalable BI solutions, accelerating analytics delivery and supporting data-driven business decisions.

- Developed interactive **Power BI** and **Tableau** dashboards using **SQL**, delivering executive KPI reports and operational insights that improved visibility into business performance across multiple client projects.
- Built and maintained **SQL**-based ETL workflows with **Python** to automate data extraction, transformation, and reporting processes, improving data accuracy and reducing manual effort by **25%**.
- Automated recurring reporting and data refresh workflows using **Apache Airflow** and **SQL**, reducing report preparation time by **30%** and ensuring timely delivery of business-critical metrics.
- Optimized complex **SQL** queries through indexing, query tuning, and execution plan analysis, significantly improving dashboard performance and reducing report execution time on large datasets.
- Partnered with business stakeholders to analyze trends, prepare variance and KPI reports, and create interactive visualizations in **Power BI** and **Tableau**, supporting data-driven planning and operational decisions.
- Consolidated data from **PostgreSQL**, **MongoDB**, and other enterprise systems into centralized reporting repositories while performing data validation and reconciliation to improve reporting consistency and data quality.

EDUCATION

Master of Science in Business Analytics - Clark University, MA, USA	Aug 2022 – May 2024
Bachelor of Technology in Electrical and Electronics Engineering - JNTUH College of Engineering, India	Aug 2015 – Aug 2019
